# WILDFLOWERS OF THE PARKS

Newport News, Virginia

Black-Eyed Susan

## Welcome...

Newport News is located in what is called the Peninsula area of the Coastal Plain region of Virginia. Its forests, fields, rivers, marshes and grasslands provide habitats for a variety of wildflower species.

Save this brochure; it can be used at any of the City's parks and provides a nice record of "wildflower sightings."

The following wildflowers have been found in the parks located in the City of Newport News.

Please contact us at the number or address on the back of this brochure if you note any additions to this list.
